

Rounding to the Nearest 10th

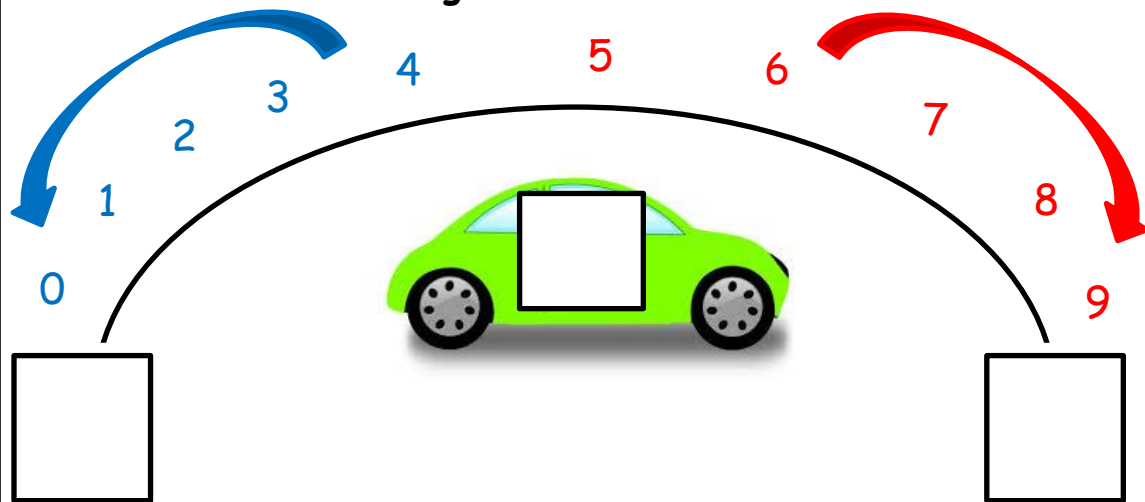

Look at the number in the ones place.
If it is 5 or more, round up. If it is 4
or less, round down.

Example:

30 ← 36 → 40
36 would round up to 40

Rounding to the Nearest 100

Look at the number in the tens place.
If it is 5 or more, round up. If it is 4
or less, round down.

200 ← 234 → 300
234 would round
down to 200
