

Re-Civilization

The Earth has grown too hot for humans to survive. Earth is making plans to send a small group of people to the inhabitable planet Kepler-22b in the constellation Cygnus. NASA has asked for your help in choosing which **8 people** should go to the new planet to rebuild human civilization.

Choose a **Chairperson**, who will be responsible for making sure that everyone in your group has a chance to have their opinions heard.

Choose a **Diplomat**, who will be responsible for solving any disputes that may arise in your group.

Choose a **Scribe**, who will record your choices and reasons for sending them.

Choose a **Reporter**, who will share your decisions and reasonings with the class.

Talk in your group and decide which 8 people you will recommend to rebuild human civilization and why.

1. 22-year old female, singer, dancer, actress, smoker
2. Mozart
