

## Sort 25 AR, ARE, AIR

This week we will be learning about the letter R affects the sounds in some words.

ar: short A sound accompanied by the letter R

are/air: long A sound accompanied by the letter R

ear: will be oddball words as EA makes the long A sound as opposed to a long E sound as previously learned

Other oddball word are: Where (long A sound w/o 'air. are or ear') heart (Short A sound with EAR pattern)

Please bring to you child's attention all the homophones (words that sound the same but have different spellings) in this list. Have them sort the pair of homophones.
