

Wednesday April 1, 2026

Dear Families,

Our field trip to Science World was an engaging and enjoyable learning experience for the class. Students had a great time exploring the exhibits and participating in a variety of hands-on activities. A highlight of the day was the coding workshop where the students learned how to program a set of instructions to move a robot. I would like to extend a sincere thank you to our parent chaperones for their support in supervising and assisting the students throughout the field trip.

Today, the students were introduced to a new activity called the **Walk30 Challenge**. This is a free, community-based initiative that encourages individuals, schools, and organizations to stay active while promoting environmental awareness. Each student has received a tracking sheet to record the number of minutes walked outside of school during the month of April. I will be tracking their walking time at school as well. At the end of the month, all tallied minutes will be combined and submitted for a chance to win a school prize. For more information, please visit <https://www.walk30.ca>.

Sincerely,  
Mrs. Hon

*Wishing these students a  
Happy Birthday in April.*

**Emily Sophia W. Dorothy**
