

- What makes 10 with the first number?
Subtract that amount from the second number.
- Use 10 to add.

first number second number

$$\begin{array}{r} 8 \\ + \boxed{2} \\ \hline 10 \end{array}$$

$$\begin{array}{r} 5 \\ - \boxed{2} \\ \hline \boxed{3} \end{array}$$

$$8 + 5 = 10 + \underline{3} = \underline{13}$$

$$\begin{array}{r} 8 \\ + \boxed{} \\ \hline 10 \end{array}$$

$$\begin{array}{r} 7 \\ - \boxed{} \\ \hline \boxed{} \end{array}$$

$$8 + 7 = 10 + \underline{} = \underline{}$$

$$\begin{array}{r} 8 \\ + \boxed{} \\ \hline 10 \end{array}$$

$$\begin{array}{r} 8 \\ - \boxed{} \\ \hline \boxed{} \end{array}$$

$$8 + 8 = 10 + \underline{} = \underline{}$$

$$\begin{array}{r} 9 \\ + \boxed{} \\ \hline 10 \end{array}$$

$$\begin{array}{r} 3 \\ - \boxed{} \\ \hline \boxed{} \end{array}$$

$$9 + 3 = 10 + \underline{} = \underline{}$$

$$\begin{array}{r} 3 \\ + \boxed{} \\ \hline 10 \end{array}$$

$$\begin{array}{r} 9 \\ - \boxed{} \\ \hline \boxed{} \end{array}$$

$$3 + 9 = 10 + \underline{} = \underline{}$$

$$\begin{array}{r} 8 \\ + \boxed{} \\ \hline 10 \end{array}$$

$$\begin{array}{r} 6 \\ - \boxed{} \\ \hline \boxed{} \end{array}$$

$$8 + 6 = 10 + \underline{} = \underline{}$$

- Which two questions have the same answer?
Why did that happen?
Which question was easier?
