

Practice 21

Use multiplication to solve each word problem.

1. Layla played 3 rounds and won 2 marbles in each round.

$$3 \times 2 = \underline{\quad}$$

Layla won marbles.

2. Mel played 2 rounds and won 4 marbles in each round.

$$2 \times 4 = \underline{\quad}$$

Mel won marbles.

3. Cassie played 5 rounds and won 2 marbles in each round.

$$5 \times 2 = \underline{\quad}$$

Cassie won marbles.

4. Mohammed played 1 round and won 2 marbles.

$$1 \times 2 = \underline{\quad}$$

Mohammed won marbles.

5. Flavia played 6 rounds and won 2 marbles in each round.

$$6 \times 2 = \underline{\quad}$$

Flavia won marbles.

6. Isidore played 2 rounds and won 7 marbles in each round.

$$2 \times 7 = \underline{\quad}$$

Isidore won marbles.
