

Multiplication War

- LEVEL:** Grade 3
- SKILLS:** multiplication facts
- PLAYERS:** 2
- EQUIPMENT:** cards (Ace = 1) - 5, or (Ace = 1) - 9 for advanced players
- GETTING STARTED:** Players divide cards evenly between themselves. Players turn over two cards each and multiply them. The player with the highest product collects all four cards. In the event of a tie, (ie: the same answer), each player deals out three more cards face down. Two more cards are turned over and multiplied. The player with the highest product collects all of the cards. Play continues until one player has collected all of the cards. See page 4 - 4 for illustration.
- VARIATION:** a 10's pile can be added so players are always multiplying by 10.
