HOW BIG IS A TABLE?

You will need a piece of paper like a sheet of $8\frac{1}{2}$ x11 printer paper or a sheet of newspaper.

How many pieces of paper do you think it will take to cover your table?

Now try it.

Using the same piece of paper, do you think it will take more or fewer pieces of paper to cover your bed?

Use the same piece of paper to cover other objects around the house. What do you notice when you compare your measurements?
