

# City Skyline Arrays

**Objective:** Practice basic multiplication skills using arrays.

**Materials:** City Skyline Grid Paper (page 2 of this PDF file); markers or crayons

**Overview:** Kids will love designing their own skyscraper arrays! This is a fun math project that reinforces basic multiplication skills.

**Here's what to do in a few easy steps:**

- Draw vertical rectangles of various sizes.
- Fill in some of the individual squares inside the buildings to make windows.
- Color the skyscrapers. Add a background too!
- Write the multiplication fact shown inside each building.
