## LEARNING ABOUT HIV & AIDS and HEPATITIS B/C

Blood-borne infections such as HIV & AIDS and Hepatitis B/C can be difficult to talk about, but it is important to share what we know with those around us. Increasing understanding about these viruses will help prevent them from spreading.

Take this handout home. Share it with a parent or guardian, and ask that person if you can complete it together.

Schedule a time with the adult for the interview. Give the adult this handout so that they can think about the answers before the interview.

Interview the adult using the questions provided. Allow at least a half an hour.

Both you and the adult sign the tear-off slip at the bottom of the page when the interview is complete. This tear-off slip can be handed in to show that you have completed the activity. *Answer on looseleaf.*

1. When did you first hear about HIV & AIDS? Hepatitis B/C?
2. When you were my age:
  - a) Were there diseases like HIV & AIDS or Hepatitis B/C? What were they?
  - b) Did your parents talk with you about disease prevention? What did they say?
3. How have HIV & AIDS and Hepatitis B/C affected you?
4. What would you like to tell me about HIV & AIDS and Hepatitis B/C?

~~(Tear off and hand in this slip only)~~ *Staple to looseleaf please.*

We completed the "Learning About HIV & AIDS and Hepatitis B/C" interview.
