How many millimetres are in 1 cm? \_\_\_\_\_

Explore

| Given measurement       | Object name | Actual measurement |
|-------------------------|-------------|--------------------|
| About 25 mm             |             |                    |
| About 80 mm             |             |                    |
| About 250 mm            |             |                    |
| Between 500 and 1000 mm |             |                    |
| Shorter than 10 mm      |             |                    |

What were your strategies for estimating which object would be that measurement?

What is a **referent**? (The definition is in the glossary of your textbook)

EXPLORE – p. 128

Simon wants to build a rectangular pen in his backyard for Smiley the pig. The pen will be the shape of a RECTANGLE. He was 22 metres of wire to make the fence around the pen. Simon wants to greatest possible **AREA** for the pen. The perimeter can only be as big as 22 metres because that's how much wire he has. On the graph below, draw all possible rectangles with a perimeter of 22 cm.

EXPLORE – p. 128

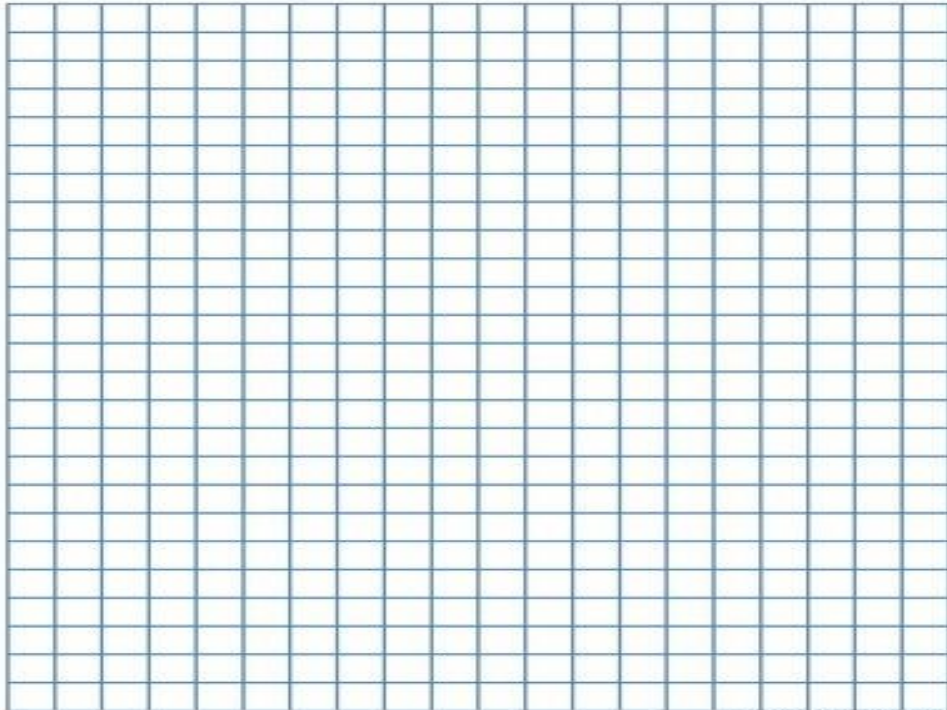

| Length (cm) | Width (cm) | Area (cm <sup>2</sup> ) | Perimeter (cm) |
|-------------|------------|-------------------------|----------------|
| 1           | 10         | 10                      | 22             |
| 2           | 9          | 18                      | 22             |
| 3           |            |                         |                |
| 4           |            |                         |                |

3) The area of a rectangular garden is 64 m<sup>2</sup>.

**Step 1**

Build all the possible rectangles with an area 64 m<sup>2</sup>. Record your results in the table.

| Area (m <sup>2</sup> ) | Length (m) | Width (m) | Perimeter (m) |
|------------------------|------------|-----------|---------------|
| 64                     | 1          |           |               |
| 64                     |            |           |               |
| 64                     |            |           |               |
| 64                     |            |           |               |
| 64                     |            |           |               |

**Step 2** Look at the data in the table.

What is the greatest perimeter the garden could have? \_\_\_\_\_

What is the least perimeter the garden could have? \_\_\_\_\_

**Step 3** Why might someone make a garden with the least perimeter?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

4) Label the rectangles A, B, C, and D.

5b) You won't be able to sketch the 1 x 30 rectangle.

| Length (m) | Width (m) | Perimeter | Area (m <sup>2</sup> ) |
|------------|-----------|-----------|------------------------|
| 1          | 30        | 62 m      | 30 m <sup>2</sup>      |

|   |  |  |                   |
|---|--|--|-------------------|
| 2 |  |  | 30 m <sup>2</sup> |
| 3 |  |  | 30 m <sup>2</sup> |
|   |  |  | 30 m <sup>2</sup> |
|   |  |  | 30 m <sup>2</sup> |

5a) Make a drawing of the rectangles on the grid below:

- 1) Before you fill your first box with cubes, estimate how many it will hold. \_\_\_\_\_
- 2) How did you make your estimate? \_\_\_\_\_  
\_\_\_\_\_
- 3) How many cubes did the first box hold? \_\_\_\_\_
- 4) Estimate how many cubes the second box will hold. \_\_\_\_\_
- 5) How many layers does the second box hold? \_\_\_\_\_
- 6) How many cubes are in each layer? \_\_\_\_\_
- 7) How did you find the volume without counting every cube? \_\_\_\_\_  
\_\_\_\_\_
- 8) How did you use the grid lines on the boxes to help you find the volume? \_\_\_\_\_  
\_\_\_\_\_

Read this at least twice to understand it.

### **What is a centimetre cube?**

-A centimetre cube has a volume of  $\text{cm}^3$  and there is a small 3 above cm. The  $\text{cm}^3$  is a standard unit of volume. When we find out how many centimetre cubes will fit in a box, we are finding its volume in cubic centimetres. **Volume** measures the amount of space inside of an object.

- 9) What is the volume of box 1? \_\_\_\_\_
- 10) What is the volume of box 2? \_\_\_\_\_

9)

Use centimetre cubes.

**Step 1** Build a rectangular prism with a volume of 20 cm<sup>3</sup>.

Your prism should be 2 cm tall.

How many cubes did you use? \_\_\_\_\_

Why? \_\_\_\_\_

How many layers does your prism have? \_\_\_\_\_

Why? \_\_\_\_\_

How many cubes are there in one layer? \_\_\_\_\_

**Step 2** Record the dimensions of your prism in the table.

| Volume             | Length | Width | Height |
|--------------------|--------|-------|--------|
| 20 cm <sup>3</sup> |        |       | 2 cm   |
| 20 cm <sup>3</sup> |        |       | 2 cm   |
|                    |        |       |        |

**Step 3** Build a different rectangular prism with a volume of 20 cm<sup>3</sup> and a height of 2 cm.

Record your results in the table.

**Step 4** Can you build any other rectangular prisms with a volume of 20 cm<sup>3</sup> and a height of 2 cm? Explain.

\_\_\_\_\_

| Length | Width | Height | Volume             |
|--------|-------|--------|--------------------|
| 24 cm  | 1 cm  | 1 cm   | 24 cm <sup>3</sup> |
| 12 cm  | 1 cm  | 2 cm   | 24 cm <sup>3</sup> |
| 12 cm  | 2 cm  | 1 cm   | 24 cm <sup>3</sup> |
|        |       |        | 24 cm <sup>3</sup> |
|        |       |        | 24 cm <sup>3</sup> |
|        |       |        | 24 cm <sup>3</sup> |
|        |       |        | 24 cm <sup>3</sup> |
|        |       |        | 24 cm <sup>3</sup> |
| 4 cm   | 3 cm  | 2 cm   | 24 cm <sup>3</sup> |
|        |       |        | 24 cm <sup>3</sup> |
|        |       |        | 24 cm <sup>3</sup> |
|        |       |        | 24 cm <sup>3</sup> |

How did you know that each rectangular prism had a volume of 24 cm<sup>3</sup>?

|  |
|--|
|  |
|  |

How many cubes would there be in each layer if the prism had 2 layers? \_\_\_\_\_

How many cubes would there be in each layer if the prism had 3 layers? \_\_\_\_\_

How many cubes would there be in each layer if the prism had 4 layers? \_\_\_\_\_

How many cubes would there be in each layer if the prism had 6 layers? \_\_\_\_\_

How many cubes would there be in each layer if the prism had 8 layers? \_\_\_\_\_

How many cubes would there be in each layer if the prism had 12 layers? \_\_\_\_\_

Is there more than one way to build a prism of 24 cm<sup>3</sup> with only 1 layer?

|  |
|--|
|  |
|  |

What strategy did you use to find all the possible rectangular prisms?

|  |
|--|
|  |
|  |

2)

|   | Length | Width | Height | Volume             |
