FLOAT YOUR BOAT

Unusual items

Brainstorm a list of everyday items you use. List about 10 items.

Choose 3-5 items from your list and come up with some unusual uses for each of these items. Include a picture or diagram showing the new uses. Share your ideas with a friend.

Make a boat that can really float (using your sink or bathtub). Use materials around your house like tape, cardboard, wooden sticks, etc. Like a scientist, test it out to see if your boat floats. If your design does not work, reflect and then modify your design and test it out again until it works just right!
